Professional Summary

Aspiring Product Manager and Data Analyst with hands-on experience in product research, PRD creation, and data-driven problem solving. Skilled in translating user problems into structured product requirements and building simple analytical and Python-based solutions. Strong interest in offline-first products and accessibility-focused design.

Skills

- Product Management: Product research, problem definition, user personas, PRD writing, feature prioritization, usability analysis
- Data Analytics: SQL fundamentals, data cleaning, exploratory data analysis, KPI understanding
- Programming Languages: Python, SQL, Java
- Data Visualization Tools: Power BI, Tableau, Excel
- Design & Prototyping: Figma
- Data Science Basics: Statistics fundamentals, data workflows

Projects

MediQR – Product Management Case Study (PRD)

Constructed end-to-end product research for MeiQR, an offline medicine guidance concept targeted at rural and low-literacy users. Defined problem statements, user personas, MVP scope, feature prioritization using RICE framework, user stories, and acceptance criteria. This project exists as a research-based PRD and has not been developed as a live product.

datasay – Python Library

Developed a lightweight Python library that converts numeric datasets into human-readable text insights, focusing on clarity, simplicity, and trend interpretation.

Education

Bachelor of Engineering in Computer Science – Mount Zion College of Engineering and Technology (Pursuing), Pudukkottai – 2023 -2027

Higher Secondary Education – Karpaga Vinayaga Metric Higher Secondary School, Pudukkottai
